Profile

A software engineer with a passion for solving problems by building tools that maximize one's potential.

Technical Projects

Fâna, *Creator, Software Engineer* (fana-io.github.io)

2022 – present

Fâna is an open-source feature flagging platform designed to accommodate testing in production by providing the capability to target specific subsets of users.

- Designed a scalable architecture composed of a backend API, database, frontend dashboard, reverse proxy API service, and software development kits (Node.js, React, Go, PostgreSQL)
- Spearheaded development of React dashboard and design of efficient payload requests from the API
- Coordinated development of React and Node.js SDKs, prioritizing privacy of sensitive information
- Drafted documentation for flag and audience management on the dashboard, and proper use of the SDKs
- Automated cloud deployment to create and configure 13 constructs on AWS using Cloud Development Kit
- infrastructure as code (Fargate, EC2 Load Balancer, ECS, ECR, RDS, ElastiCache, VPC)
- Developed and unit-tested flag evaluation algorithm by parsing combinations of logic conditions
- Authored a comprehensive case study  on the design challenges & decisions (fana-io.github.io/case-study)
- Collaborated daily with a remote team of 4 engineers across the US

Launch School

2020 – 2022

- Attended a mastery-based education program focused on software engineering fundamentals
- Developed open-source web applications with Node, Express, PostgreSQL, React, JavaScript, HTML, and CSS
 - RequestBucket: A Node.js app built with Express, Mongo, and PostgreSQL to capture and monitor webhooks
 - Frello: A Node.js kanban board application built using Express, Mongo, and React/Redux
 - TakeMeTo: A React SPA built with a Node.js and Express backend that displays local city information
 - InterImage: A React SPA built with MERN stack that accepts image uploads and provides a link for later access

Professional Experience

Ad Operations Solutions Specialist, *Hulu / Disney*

2019 – 2022

- Built automation tools designed to optimize workflows for over 80 Ad Ops team members (Excel, VBA, JS)
- Wrote detailed documentation for aforementioned tools and internal processes for reference and training
- Worked cross-functionally between Ad Ops and Engineering to troubleshoot and address platform issues
- Composed SQL queries across six tables, producing reports of normally inaccessible data (Datagrip/MariaDB)

Project Manager, *Centerfield Media*

2017 – 2019

- Coordinated design and engineering teams through ideation, review, development, QA, and launch processes
- Drafted and tracked detailed JIRA tickets for in-house and offshore teams across entire web dev pipeline

Technical Skills

Front End

JavaScript, TypeScript, React, Redux, MaterialUI, HTML/CSS, jQuery, Handlebars, Pug

Back End

Node.js, Express, Go, Gorilla Mux, PostgreSQL, MariaDB, VBA, MongoDB, RESTful APIs

Other

Git/Github, Docker, Redis, AWS, Server-Sent Events (SSEs), NPM, Jest, Cypress, JIRA

Education

BA, Business Administration (Marketing), *CSU Fullerton*

2011 – 2016
